---

Information Technology graduate with a specialization in Business Analytics and foundational knowledge in software and web development, system design, and data analysis. Experienced in developing functional, user-focused applications and working collaboratively on technology-driven projects. Familiar with modern development tools and technologies, with strong problem-solving, adaptability, and attention to detail. Seeking an entry-level Software Developer, Web Developer, or IT-related role where I can apply my technical skills, contribute to team projects, and continue developing professionally.

KEY SKILLS

- Programming Language: Java, Python, Java Script, PHP, and C++.
- Frameworks & Libraries: HTML, Tailwindcss, Laravel, Nextjs, Reactjs, and Flutter.
- Database & Backend: SQL, MySQL, and Firebase.
- Data Analysis: Google Colab, Looker Studio, and Power Bi
- Design & Tools: Figma, Canva Git, and GitHub

PROFESSIONAL EXPERIENCE

Software Engineer Intern | Junior Dev

Center for Artificial Intelligence and Smart Technologies (CAIST) BatStateU - TNEU

February 2026 - May 2026

- Designed and developed a fully functional Food Ordering System using Laravel, ReactJS, Tailwind CSS, and MySQL, following the complete Software Development Life Cycle (SDLC) from planning and database design to implementation and testing.

- Contributed to ***Leonaidas***, an internal **CAIST** project, handling software documentation (DFDs, Use Case Diagrams, ERDs, flowcharts, user manuals, and test cases), as well as manual and automated testing using PHPUnit and Playwright. Performed basic penetration testing using tools such as Kali Linux, OWASP ZAP, Nmap, Nikto, and Burp Suite. Also served as project manager, overseeing task delegation, progress tracking via Gantt charts, and version control and collaboration using CodeStash throughout the development lifecycle

Capstone Project

SmartResto: A Business Analytics Driven Decision Support System for Casa Gatchalian

- Developed a web-based management system for a hospitality and events business, integrating Point-of-Sale (POS), booking, and real-time dashboards to streamline operations.
- Key Features: Reservation system, POS for sales tracking, financial reporting, and AI-driven analytics.
- Technologies: Laravel, Reactjs, MySQL and Hostinger.

EDUCATION

Bachelor of Science in Information Technology *Batangas State University-TNEU-Alangilan Campus*
August 2022 - 2026
