Kariel Coleen G. Mauzar

Lemery, Batangas • mauzarkc@gmail.com • 09496080398 • www.linkedin.com/in/kariel-coleen-mauzar/

Professional Summary

Information Technology fresh graduate specializing in Business Analytics with hands-on experience in full-stack web development, software testing, database management, and data analytics. Experienced in developing web applications using Laravel, ReactJS, PHP, JavaScript, and MySQL, with exposure to AI-powered solutions and predictive analytics. Seeking a Junior Software Developer, Full-Stack Developer, or related role where I can contribute to real-world projects while continuing to strengthen my technical skills.

Education

Batangas State University — Batangas City, Batangas
BS in Information Technology, Specialized in Business Analytics — *August 2022 – August 2026*
Relevant Coursework: Software Development, Systems Quality Assurance, Web Systems and Technologies, Data Analytics

Lemery Senior High School — Lemery, Batangas
Senior High School, TVL-ICT (Information and Communication Technology) — *2020 – 2022*
Relevant Topic: Java Programming & Animation

Experience

Center for Artificial Intelligence and Smart Technologies (CAIST) — BatStateU - TNEU
Software Engineer Intern — *February 2026 – May 2026*

- Developed a full-stack Food Ordering System using Laravel, ReactJS, Tailwind CSS, and MySQL, applying the complete Software Development Life Cycle from planning and database design to implementation and testing.
- Contributed to an internal CAIST project through system documentation, manual and automated testing using PHPUnit and Playwright, and basic penetration testing using OWASP ZAP, Nmap, Nikto, and Burp Suite.
- Served as project manager, coordinating task assignments, progress tracking through Gantt charts, and team collaboration throughout the development lifecycle.
- Proposed and led an AI-powered recommendation feature prototype, designing its workflows, business logic, and technical specifications for potential future integration.

Projects

Capstone Project: SmartResto: A Business Analytics Driven Decision Support System for Casa Gatchalian
Laravel, Reactjs, MySQL and Hostinger.

- Developed a web-based Point-of-Sale (POS) system for automated order processing and transaction recording.
- Implemented an online reservation and booking module for managing room and event reservations.
- Built a centralized business analytics dashboard with interactive visualizations, real-time performance monitoring, and AI-powered predictive insights.
- Applied predictive analytics and demand forecasting to historical sales and order data to identify trends, peak periods, and customer behavior patterns.

Centralized Gas Station Management & Mobile POS System – CJG Gasoline Station
React, TypeScript, Vite, Tailwind CSS, Node.js, PostgreSQL, Prisma, REST API

- Developing a web-based management system to centralize operations across **three gasoline station branches**, covering sales, fuel inventory and reconciliation, staff shifts, customer loyalty, reporting, and business analytics.
- Building the frontend with **React and TypeScript** and a **Node.js/TypeScript REST API**, with PostgreSQL and Prisma for relational data management.
- Collaborating with the client to translate real-world operational requirements into functional system modules and workflows.Implementing responsive interfaces, data validation, reporting dashboards, and application testing using modern development tools and practices.

Skills

Programming Language: Java, Python, Java Script, PHP, and C++.
Frameworks & Libraries: HTML, Tailwindcss, Laravel, Nextjs, Reactjs, and Flutter.
Database & Backend: SQL, MySQL, and Firebase.
Data Analysis: Google Colab, Looker Studio, and Power Bi
Design & Tools: Figma, Canva Git, and GitHub
AI/ML Tools: Codex, Gemini, Claude, DeepSeek, ChatGPT
